Summary

Versatile, polyglot software engineer with over 30 years of experience delivering quality, enterprise-scale, full-stack solutions across healthcare, finance, and tech. Led cloud migrations, data platform transformations, and CI/CD automation that improved deployment speed and reduced infrastructure costs. Architect and designer for PC, (virtual) server, public and private cloud, various platforms, and computing environments. Software artist and technologist, equally at home with low-level software, assembly, and firmware, to the high-level abstractions, with a proven track record of mentoring teams, driving innovation, and solving complex technical challenges.

Skills & Expertise

- **Leadership & Strategy**: Engineering leadership, cross-functional collaboration, mentoring, technical evangelism; *A true leader is not someone who creates followers, but creates other leaders*
- **Software Development**: Java, C/C++, Python, Clojure, Go, Groovy, PRPC
- **Cloud & DevOps**: Kubernetes, OpenShift, Azure, AWS, Docker, REST, Graph API
- **Core Traits**: Persistent, curious, creative, optimistic, and relentlessly quality-focused

Professional Experience

UnitedHealth Group/Optum Tech, Eden Prairie, MN — *Lead Software Engineer*
May 2011 - PRESENT

- Completed AI Dojo training – created a proof-of-concept agent, using LangChain, to validate claims
- Researched and validated an MCP connection between LLM model and Pega platform
- Modernized licensure renewal platform, improving performance, reduced tech debt
- Led migration of legacy systems to OpenShift/Kubernetes, reducing deployment time
- Automated CI/CD pipelines using Jenkins and Artifactory, increasing release frequency and reliability
- Migrated petabytes of member data to a new platform, retired outdated claims systems
- Championed Infrastructure as Code (IaC) adoption, aligning teams with enterprise cloud standards
- Provided architectural guidance on scalable architecture for dozens of different applications
- Mentored junior engineers and fostered a culture of technical excellence across teams
- Advised multiple engineering teams on scalable architecture, boosting system uptime and maintainability

Blue Cross Blue Shield of Minnesota, Eagan, MN — *Sr. Software Engineer*
August 2007 - April 2010

- Engineered and implemented a business rules engine for electronic claims adjustment, alleviating manual processing; jointly forged new UI with business users
- Re-architected the NPI application with a new data model, improving data accuracy and performance
- Supported the infrastructure team hosting PegaRules Process Commander (PRPC) in an era before DevOps
- Worked to resolve numerous issues peripheral to the project, but essential to continued operation and demand usage

Greg Parks

APPLE VALLEY, MN 55124
(612) 759-5738 | GPARKS@ACM.ORG

ResCap, Richfield, MN — *Sr. Software Engineer*
May 2000 - July 2007

- Re-engineered and ported the primary automated loan evaluation system.
- Participated in initial design and architecture, selection of a new technology platform, and investigation of the solution.
- Led a team of developers in the development and implementation of a new pricing application.
- Retired a legacy "pricing" application and successfully replaced it with a framework project.

StorageTek, MN — *Software Engineer*
1998 - 2000

- Designed and architected "serverless-backup" feature for flagship SAN "intelligent hub" offering.
- Developed test harnesses and automation scripts for various hardware protocols.

CyberOptics, Minneapolis, MN — *Software Engineer*
1995 - 1998

- Developed controls for hardware operation and measurement calculations.
- Designed, architected, and implemented an automation server for 3D spatial transformations and calibration.
- Represented the company at industry standards meeting for SECS/GEM definition, and implemented interface for company products.

Education

- **B.S. Computer Science** – Bethel College, St. Paul, MN

- **M.A. Pastoral Counseling** – MN Graduate School of Theology

Additional Information

- Member of Mensa International
- Lifelong learner and autodidact in AI/ML, blockchain, and fintech innovations, interested in quantum computing, space exploration (and thus orbital mechanics), and advanced mathematics.
